

New BCM & Operations Solution, featuring new BCM Mobile Application

RSA Archer Business Continuity Management & Operations

provides a 3-in-1 solution for managing business continuity, disaster recovery and crisis management, and aligning continuity planning with the organization's business priorities. The solution automates the process of designing and testing BC, DR and crisis plans according to industry standards for consistent crisis response to minimize risks and financial impacts. To read the press release [click here](#).

RSA Archer BCM Mobile Application for iPhone and iPad enables users to view business continuity or disaster recovery plans and associated strategies, tasks, calling trees, and requirements from their Apple iOS device. If the datacenter goes down during a disaster or crisis, the end user will still have access to BC/DR plans, and be ready to take action.

New Modules Updates

Please note that "Solutions" are now called "Modules". Below is an overview of the key updates to each module with links to the new documentation on the RSA Archer Exchange:

- **Business Continuity Management:**
Risk and impact analysis including a new BCM risk register, merged BC and DR plans, crisis management including crisis event logging, BC and DR plan activation, and emergency notifications
- **Enterprise Management:**
Business Impact Analysis to assess criticality of business processes and enterprise assets
- **Threat Management:**
Threat project and threat assessment applications, NIST NVD (National Vulnerability Database) feeds, and Symantec DeepSight threat intelligence update
- **Issue Management:**
New Policy Change Recommendation application

RSA Security Analytics Virtual Event

January 30: 9 am ET/2 pm GMT &
1 pm ET/6 pm GMT OR
