RSA Archer GRC Summit 2013: Thank you for attending

Thank you to all who attended the RSA Archer GRC Summit last month...a decade of sharing your success! Visit the [RSA Archer Community](#) to find the Summit presentations as well as a listing of all the 2013 Summit award winners. Congratulations to the winners and thank you to all who attended! For fun, revisit the [Summit closing video](#) that depicts the tremendous sessions, networking events, and our sponsor exhibits.

5.4 Platform Launched

The RSA Archer GRC Platform 5.4 launched on June 19. The key enhancements include: Trending of Content, Bulk Delete, Direct to Edit and Multi-lingual RSA Archer. You can access the installer on SCOL (you must be registered to access – [click here to register](#)). The platform launch documents are posted on the [RSA Archer Community](#). You must be registered and logged in to view these documents. To learn more about this release, please listen to the [webcast replay](#).

New Enterprise Risk Management Solutions

We are pleased to announce two enhanced solutions that will help provide an integrated view of risks your enterprise is facing.

- **[RSA Archer Risk Management 4 HF1](#)** now offers out-of-the-box Monte Carlo simulation integration to augment existing quantitative risk assessment capabilities. You can export risk register and loss events into external Monte Carlo models and return the model output to Archer for harmonization with other assessment approaches being used enabling better estimation of risk. If you do not already have Monte Carlo capabilities in-house, RSA Archer provides integration capabilities with [Palisade @Risk Monte Carlo Simulation](#).
- **[RSA Archer Vendor Management 4](#)** is now available to address regulatory requirements for third party due diligence and performance management. This release includes enhancements for vendor on-boarding, new assessments across 7 risk categories, capabilities to document vendor certificates of insurance, and support for complex, multi-level vendor and contract hierarchies. For more information, listen to the [Vendor Management webcast replay](#) or visit the [RSA Archer Exchange](#) for the latest documentation.

New Federal Solutions

RSA Archer Federal Solutions – Assessment & Authorization (A&A) and Continuous Monitoring (CM) – provide the foundation for a comprehensive Information Assurance Management suite and enable FISMA

compliance while improving security.

- **RSA Archer Assessment & Authorization (A&A)** (A&A) is purpose-built to meet the unique needs of U.S. federal agencies providing an ideal foundation for comprehensive RSA Archer-based Information Assurance Management. IT resources can be assigned into information system boundaries for A&A and FISMA compliance and reporting. RSA Archer A&A manages the full cycle of NIST RMF (800-37) activities. It also integrates seamlessly with RSA Archer Continuous Monitoring and maximizes existing agency infrastructure investments.
- **RSA Archer Continuous Monitoring (CM)** is also purpose-built to meet the unique needs of U.S. federal agencies, providing capabilities essential to an Information Assurance (IA) program. Continuous Monitoring provides near-real-time insight into the security posture of every device in the enterprise – scoring, sorting, and ranking devices by risk for fast, efficient “worst-first” resolution.

For more information on these new solution enhancements, please listen to our recent [webcast replay](#) on this topic or visit the [RSA Archer Exchange](#) for the latest documentation.

New Offerings and Integrations Available

We will frequently launch new industry, functional solutions and integrations. The latest releases include:

- **Regulatory Change Management 2 Solution**
In today's complex regulatory environment, your organization's regulatory compliance landscape changes quickly. RSA Archer Regulatory Change Management 2 helps organizations address the challenges associated with tracking regulatory change.
- **Model Risk Management Solution**
RSA Archer Model Risk Management helps organizations address the challenges of effectively managing their business model inventory by providing:
 - A centralized system to track and monitor business risk models
 - Increased visibility across the enterprise to the health and status of their risk models
 - Processes for model validation and testing
 - Clear reporting and metric tracking

Be sure to check out the other recently released offerings available on the RSA Archer Exchange:

- **Stakeholder Evaluations Solution**
 - **Code of Federal Regulation Solution**
 - **Skybox Security Risk Control Integration**
 - **Policy Management Mail Merge Template**
-

Make the Switch to RSA Archer Business Continuity Management

See how easy it is to implement RSA Archer Business Continuity Management & Operations with a special 30-day trial program. This trial and a special offer ends on July 31st. Want to learn more? Find out how [Sprint](#) migrated to RSA Archer BCM & O from a different tool. Then, [sign up for your free trial](#).

Upcoming Webcasts

- 7/25 @ 11am ET: Maximum-Strength Threat Detection for Smaller Enterprises: Scale with RSA Security Analytics
- 8/8 @ 11am ET: Be empowered to know how IT security risks impact your business – Co-sponsored with Accuvant
- 8/22 @ 11am ET: RSA Archer Enterprise Risk Management (Check our website as registration will be opening soon)

Tech Huddle Webcasts - For Customer/Partners Only

Designed specifically for RSA Archer users, these technical and informational weekly webcasts occur on **Fridays at 12 noon ET**. Upcoming topics include:

- 7/26 - Install/Instance Plug in Reports
- 8/2 – Searching/Reporting Case Studies

Instructions to join Tech Huddles:
